ALBERTA'S AGRICULTURAL EXPORTS

1986

COMMODITY BY COUNTRY

This publication is produced by the Statistics Branch of Alberta Agriculture. The efforts of Lynn Johnston were instrumental in its preparation and are particularly appreciated. We also wish to acknowledge people in industry and government who contributed information.

INTRODUCTION

This report covers the calendar year 1986 and complements the report entitled Alberta's Agriculture Exports 1986, Country by Commodity. While the first report covered exports from the province by country, this report covers exports from the province by commodity. The level of commodity disaggregation provided in this report is greater than the previous report. Because categories are not identical for both publications, there are minor differences in total export values between them. Estimates of quantities and values of exports for Alberta, Western Canada and Canada are included.

SOURCES AND METHODS

The primary sources of data for out-of-country exports were Statistics Canada Catalogues 65-003 (Exports by Countries) and 65-004 (Exports by Commodities), supplemented with provincial level information from the Alberta Bureau of Statistics and other Statistics Canada publications.

A number of adjustments and revisions were made to Statistics Canada's exports by province of lading data to arrive at estimated Alberta exports as reported in this publication. These adjustments were necessary to overcome inadequacies in the province of lading concept which, in many cases, does not provide export information by province of origin. This is especially true for a landlocked province such as Alberta. The information necessary to adjust Statistics Canada data for Alberta exports was gathered from many sources within Alberta Agriculture, other government departments and industry.

In particular, the figures reported for grains and oilseeds and their products have been adjusted to reflect provincial production statistics and actual shipments for the calendar year 1986.

OUT-OF-COUNTRY-EXPORTS*

Highlights

The value of out-of-country exports of primary and processed agricultural products in 1986 was $1,663 million or 57 per cent of out-of-province shipments. This represented a decline over 1985 which saw out-of-country exports of $1,753 million or 56 per cent of out-of-province shipments.

The corresponding out-of-country export value for Canadian exports was $9,042 million, a 4 per cent decline over the previous year's value of $9,569 million. Alberta accounted for approximately 18 per cent of total Canadian agricultural exports, about the same as in 1985.

Wheat exports, valued at $589 million continue to be the major agricultural export earner for the province accounting for over 35 per cent of export revenues. This is a significant decline over 1985 which saw wheat exports valued at $822 million or over 47 per cent of total export value.

Canola and canola products accounted for $268 million or 16.4 per cent of export earnings. This was a substantial increase from $225 million or 14.5 per cent of export earnings in 1985.

Alberta barley exports represented over 15 per cent of agricultural exports contributing almost $248

* The tables in this publication represent selected categories (i.e. some commodities are omitted) therefore export figures in this summary do not exactly correspond to the tables in this publication but rather, with the tables in the Statistics Branch publication entitled Alberta's Agriculture Exports 1986, Country by Commodity.

million dollars to export earnings. This represented a twofold increase over 1985 levels even though barley prices declined significantly during the year.

Lower world prices for grains and oilseeds during the year rather than dwindling markets, was the major factor limiting export earnings from these crops.

Live animal exports from Alberta (principally cattle & hogs) were over $115 million. This was below the 1984 record value of $138 million, but above the $106 million for 1985. Shipments of live hogs and cattle to the U.S.A. continued to be responsible for this higher than average value.

Meats and meat preparations showed a substantial increase over the previous year. In 1985, the value of meats and meat preparations exported was $143 million or 8 per cent of total export earnings. In 1986, this value increased to over $175 million or almost 11 per cent of total export earnings. Together, live animals, meats and meat preparations contributed $296 million to export earnings. This represented a 6 per cent increase over the $250 million total for the previous year.

Canola oil showed a decline in export value in 1986 largely because of depressed prices. The 1986 figure for exports was $72 million compared with $114 million in 1985, a 37 per cent decrease in export value. Canola meal showed a slight increase in value in 1986 to over $30 million from the previous year's $29 million.

Honey exports were $5 million in 1986, down from $6.5 million in 1985 and $8.5 million in 1984.

Other important Alberta agricultural exports in 1986 were cattle hides, whiskey, malt, peat moss, tallow, forage seeds, semen and embryos.

TRADING PARTNER ANALYSIS

In 1986, Alberta's most important export markets were the U.S.A., Japan, U.S.S.R., People's Republic of China, Cuba, India and East Germany. These seven nations purchased an estimated 72 per cent of Alberta's Agricultural exports. If we add in purchases by South Korea, Taiwan, Brazil and the United Kingdom, all of whom purchased in excess of $30 million, the estimated purchases of all Alberta Agricultural exports exceeds 80 per cent of total.

U.S.A.

The U.S.A. was the major market for Alberta agricultural exports in 1986. Although Japan was approximately of the same importance in dollar value, the U.S.A. purchases a wider variety of agricultural and processed products from the province. The majority of the value of Japanese purchases come from grains and oilseeds.

Exports to the U.S.A. were over $372 million in 1986, up substantially from $346 million in 1985. Increases in shipments of livestock, meat and animal products were largely responsible for the increase in export value.

Cattle exports were largely responsible for the 10 per cent increase in live animal exports in 1986. With the countervailing duty applied to hogs, swine exports to the U.S.A. declined in 1986. However, pork exports increased to more than offset the decline in live hogs. Meat and meat preparations, at $120 million, were 13 per cent above 1985 levels and remained the largest export category to the U.S.A.

Other agricultural commodities that enjoyed success in the U.S. market in 1986 were forage

seeds, cattle hides, peat moss, honey, whiskey, canola oil and canola meal.

Low global grain prices in 1986 accentuated the importance of the U.S. market in that the declines due to low grain prices were not in evidence in the U.S. market. Continued growth in exports from Alberta to the U.S. illustrate the degree to which Alberta products are being accepted in the North American market.

JAPAN

Japan imported over $359 million of food and agricultural products from Alberta, down almost 6 per cent from 1985. Both barley and canola values declined largely because of the depressed prices for these commodities in 1986. However, Japanese imports of Alberta wheat increased to $69 million from 35 million in 1985 despite lower world wheat prices. Canola, still the largest single agricultural import from the province, declined by almost 25 per cent to $148 million. Barley also declined by almost 25 per cent to $39 million.

Japan continues to be a reliable market for canola products, dehydrated alfalfa, barley malt, hides and meats.

U.S.S.R.

The U.S.S.R. regained her status as Alberta's third largest export market in 1986 largely because of increased imports of barley. Alberta exports of barley to the U.S.S.R. increased to over $77 million in 1986 from a low of $8 million in 1985, an almost ten fold increase, despite lower barley prices in 1986. Wheat export values declined to $161 million from $197 million the previous year due to price declines. Because of the increased barley purchases, U.S.S.R. imports of Alberta agricultural products totalled over $238 million in 1986, a 16 per cent increase over 1985.

PEOPLE'S REPUBLIC OF CHINA

Alberta's exports of agricultural commodities to the People's Republic of China decreased from $221 million in 1985 to $96 million in 1986, largely due to declines in wheat shipments in combination with decreased wheat prices. The value of shipments of wheat from Alberta to the People's Republic of China went from $213 million in 1985 to $79 million in 1986 or a 63 per cent decline. Of a positive nature, China re-entered the barley market and purchased over $12 million in 1986.

China is expected to increase her purchases of grains in 1987 but volumes may continue to be quite sporadic in the future because she is near self sufficiency in grain production and imports will depend on domestic growing conditions as well as government policy.

CUBA

Cuba continues to be a reliable purchaser of substantial amounts of prairie wheat. In 1986, the value of wheat imports increased by 40 per cent despite decreases in price. Cuba also imports small amounts of barley.

INDIA

India continues to be a dependable purchaser of large volumes of canola oil. Because of substantial price declines in 1986, the export value for canola oil shipped to India from Alberta declined by 28 per cent to $44 million.

EAST GERMANY

The value of barley shipments to East Germany from Alberta in 1986 was $40 million, a 60 per cent increase over 1985 despite lower barley prices. Wheat exports to East Germany declined in 1986.

EEC AND OTHER WESTERN EUROPE

Exports to Western Europe increased by 44 per cent in 1986 to $126 million, mainly due to increases in the sales of wheat and barley. Exports to this region represented approximately 7.5 per cent of the Alberta total.

EASTERN EUROPE (excluding U.S.S.R. and East Germany)

Exports to Eastern European nations other than the U.S.S.R. and East Germany were over $20 million in 1986, up from $12 million a year earlier. This region accounts for approximately 1 per cent of Alberta's exports.

MIDDLE EAST (excluding African Nations)

Exports from Alberta to the Middle East increased by 30 per cent in 1986 to over $74 million, mainly on the strength of increased barley sales to Saudi Arabia and wheat sales to Iraq.

AFRICA

Alberta exports to Africa declined by 55 per cent in 1986 to 54 million dollars. The decrease was due mainly to lower export volumes and prices for wheat, especially to Egypt and Algeria.

ASIA - PACIFIC (excluding Japan, PRC, and India)

Exports to countries in this region were estimated to be $110 million, a 50 per cent increase over 1985. Wheat exports to South Korea and hides to Taiwan were largely responsible for the increase.

SOUTH AMERICA

Exports from Alberta to South American nations decreased to $52 million in 1986 from $91 million a year earlier. Reduced grain sales to Brazil and lower prices were responsible for much of the decrease.

CENTRAL AMERICA AND THE CARIBBEAN (excluding Cuba)

Exports to this region declined to $23 million in 1986 from $28 million in 1985. Decreases were due in part to smaller sales of canola oil to Mexico.

SUMMARY

In 1986, Alberta agricultural exports to the U.S.A. increased significantly making the U.S.A. the provinces most important export market in terms of dollar value. In addition, the U.S.A. also accepts the widest variety of agricultural products from the province. Consequently, exports do not suffer from the variability that is more evident with exports to countries such as the Soviet Union, Japan and China whose imports tend to vary considerably depending on supplies and prices of grains and oilseeds.

COMMODITY ANALYSIS

The five major commodities or commodity groups, accounting for about 77 per cent of Alberta's agricultural export sales were wheat (35 per cent), barley (15 per cent), meats (10 per cent), canola (10 per cent) and live animals (7 per cent).

WHEAT

Wheat accounted for one-third of the value of exports originating in the province, down from almost one-half the value in 1985. The major customers for Alberta wheat were the U.S.S.R., People's Republic of China, Japan, Cuba, Brazil, Iraq and the United Kingdom. In 1986, China decreased her imports of wheat substantially, consequently, the Soviet Union once again became the provinces' most important market for wheat, accounting for almost 30 per cent ($161 million) of our wheat exports. China accounted for a further 13 per cent ($79 million) while Japan accounted for almost 12 per cent ($69 million) of Alberta's wheat exports. Other major customers in 1986 were Cuba (8 per cent), Brazil (5 per cent), Iraq (4 per cent) and the United Kingdom (4 per cent).

In 1986 it is estimated that 3.3 million tonnes were exported from the province for a total value of $589 million.

BARLEY

In 1986, the U.S.S.R. increased its level of barley purchases to a more normal level. With purchases valued at over $77 million, U.S.S.R. imports of Alberta barley increased ten-foid over the previous calendar year. East Germany also purchased substantially increased amounts of Alberta barley as did Saudi Arabia and the People's Republic of China. In total, imports of Alberta barley were almost $250 million compared to $123 million for the previous year. The quantity comparison shows an even greater increase for 1986. Over 2.6 million tonnes were exported this year versus 861 thousand tonnes in 1985.

CANOLA

Japan is the dominant purchaser of Alberta canola. In 1986, export volumes were at 1985 levels (550 thousand tonnes). However, because of the depressed global situation for oilseeds, the export value to Japan was down even though volumes remained steady. Japan, with purchases amounting to $148 million, accounted for 90 per cent of Alberta's canola exports. Mexico accounted for almost 7 per cent of the provinces canola exports and the Netherlands for a further 2.5 per cent.

CANOLA OIL AND MEAL

Exports of canola products in 1986 amounted to $102 million, down by almost 30 per cent over 1985. India accounted for over 43 per cent of the value of canola product shipments. Japan accounted for almost 13 per cent, mainly due to canola meal imports and the U.S.A. accounted for a further 16 per cent.

LIVESTOCK, MEAT AND ANIMAL PRODUCTS

The U.S.A. continued to be the dominant market for live animals and meats in 1986. 99 per cent of live animal exports and 74 per cent of meat exports were to the U.S.A. While beef and pork exports went largely to the U.S.A. with smaller amounts to Japan, horsemeat exports went largely to Europe and Japan with a minor amount going to the U.S.A.

The total value of exports of these commodities in 1986 was $336 million or over 16 per cent above 1985 levels.

SUMMARY

Although export volumes for the grain and oilseed category increased significantly in 1986 the decline in price levels offset much of the benefit of higher volumes. In particular, barley export volumes increased dramatically which benefited considerably the total export picture for the sector.

If wheat, which declined significantly in both volume and value, is excluded from the picture, Alberta's food and agricultural exports increased by 13 per cent in 1986. If grains and oilseed prices improve in the near term, total export values should improve significantly in the coming years.

REGIONAL ANALYSIS

In 1986, Asia imported $610 million or 37 per cent of the total provincial agricultural exports. The bulk of these purchases were grains, oilseeds and related products.

North America (U.S.A., Greenland, St. Pierre-Miq.) imported $369 million or 22 per cent, much of it livestock and meat related.

Eastern Europe was the third largest importing region for Alberta agricultural commodities with purchases of $300 million or 18 per cent. The majority of these exports were accounted for by wheat and barley exports to the U.S.S.R. and East Germany.

Africa imported $43 million or 3 per cent, consisting mainly of wheat and wheat flour.

Exports to South America accounted for 3 per cent or $52 million and were mainly wheat and canola oil.

Exports to Western Europe accounted for $126 million or 8 per cent, consisting mainly of wheat, barley and meat.

The Middle East and Central America purchased $74 million (4.5%) and $72 million (4.3%) respectively. These purchases consisted mainly of wheat and barley to the Middle East and wheat and oilseeds and canola oil to Central America.

- Totals on various tables may not add exactly due to rounding.
